Impedance Cardiography (ICG)

- 4 Dual Sensors
- 5 Minute Test
- Easy to Interpret

Medicare
Covered

Clinical Applications

Select and titrate medications:

- **Heart Failure**
Identifies patients at over 7 times the risk for death or hospitalization¹
- **Dyspnea**
Changes therapy 39% of the time²
- **Resistant Hypertension**
Results in 70% improvement in blood pressure control³

Thera Trak™ Status Report

ID: 07075 DOB: 09/13/1947 Age: 58 Male 6 ft 1 in 238 lbs BSA: 2.32 m ²		Physician Associates San Diego, CA							
Operator: Karen Label:		DRUG DOSE Furosemide 20 mg qd Enalapril 10 mg qd Carvedilol 12.5 mg bid							
Interpretation / Medication Change: Increased TFC and SVRI; SI and CI lower from prior visit. Plan: increase Furosemide to 40 mg qd, Enalapril to 10 mg bid.									
Signature:  Physician: John Smith M.D.									
ABBR.	NAME	PREVIOUS 01/08/2006 11:27:24 AM	CURRENT 01/31/2006 03:41:39 PM	UNITS	LOW	NORMAL	HIGH	NORMAL RANGE	
HR	Heart Rate	66	64	beats/min				58 - 86	
BP	Systolic/Diastolic (Mean)	130/80 (97)	134/82 (99)	mmHg				70 - 105	
SI	Stroke Index	41	33	ml/beat/m ²				35 - 65	
CI	Cardiac Index	2.7	2.1	L/min/m ²				2.5 - 4.2	
SVRI	Systemic Vascular Resistance Index	2696	3543	dyne sec cm ⁻⁵ m ²				1680 - 2580	
STR	Systolic Time Ratio (PEP/LVET)	0.62 (158/255)	0.64 (154/240)	unitless				0.30 - 0.50
